PROJECTS

Student-Management (Spring MVC)

- Student management project for handling the students and gives the options of ADD, UPDATE and DELETE options to the user.
- Used **SPRING MVC, Maven, Apache Tomcat** and **MySQL**.

Mentorship Platform (Django project)

- Made this project for my final year project.
- A platform where a startup can get mentorship by the experience mentors.
- Used **HTML** and **CSS** for frontend and **Django** for my backend part.
- I learned about the **MVT** architecture of a project

CRUD Application (JAVA, Hibernate, MySQL)

- It is advance java project where you can upload multiples images and stores it in database and helps us to do **CRUD** operations on the database.
- Used **SERVLETS, HIBERNATE, JSP** and **MySQL**.
